

Can't Make it past 7

Posted by Mendy - 04 Aug 2011 05:14

Hey it seems like the first few days always go like a breeze that I forget I even have this problem, than suddenly a week goes by and I lose it. It's getting closer to the end of the week and I'm getting nervous this may happen again.

It's that one day when I need to exercise my control that I am so use to feeling that i got it under control that I lose it.....

Does that make any sense?

When you say the first few days go like a breeze, do you mean you're not looking at women, not entertaining lustful thoughts, not m.....?

Or are you sneaking little drinks here and there, until you finally just wander into the bar?
