

dreams are invading my sanity!!

Posted by 5770 - 30 Aug 2011 17:39

been pretty good for a while now.

This never used to be a problem for me.

BUT! last few days I am getting pretty racy dreams and when I wake up I am in a bad, un-tznus mental state. I then spend the **rest of the day** in the shadow of this. I am becoming much more willing to LOOK (i.e. unsuitable adverts, internet...) ... and as a result i am getting closer to a fall.

Any tips? i feel like i need someone to slap me :-[
