Help with K9
Posted by Holy Yid - 17 Aug 2009 17:29

_____

I have a computer with windows vista 64 bits and k9 won't install on it. Does anyone know of free good filters for windows vista 64 bit?

_____

Hey Holy Yid,

Have you tried running it in compatibility mode? Right click the icon, and select properties. There, in compatibility mode, you should have the option to run the installation as a if it was created for WinXP.

Try that, and let me know if you have any success.

_____

Anybody know of a filter that will work with a PDA like a blackberry?

Me3

you should post that separately. Also contact the maker or ask a guy who works in a electric store chain.
