you're so right. I think no one's there b/c everyone thinks no one else is there. Everyone needs to take responsibility for themselves and visit the chatroom more often. Slowly but surely, it should start becoming more active.

i think the problem is that there is no way to get to the chat rooms with any third part application...

if we can have the server name and to be able to log in with our user and password through pidgin or anything similar there would be a lot more ppl going around there.... no?
