I think it's what R' Guard would call "the last throes of the YH" fighting GYE.

I was doing fine this morning until i clicked on this thread a couple of minutes ago, that's when it

BTW 90,000,000,000,000,000 Hi's would require about 160,000 Terabytes of storage (just for the hi's themselves, 2 bytes each). And it would take about 36 years to write them all to the disk (assuming current High-performance HDs). We definitely need a bigger server! wouldn't let me connect!':

Earlier I was going to post that it got much better,

but the forum didn't let the post go through.

If you disable the breathalyzer on your PC, the post will go thru regardless of your alcohol level (hic')

In honor of the upcoming elections, I would like to remind people of Obama's famous teleprompterless speech in Bristol, Virginia:

OBAMA: What they'll say is, "Well, it costs too much money," but you know what? It would cost, about... It -- it -- it would cost about the same as what we would spend... It... Over the course of 10 years it would cost what it would costs us... (nervous laugh) All right. Okay. We're going to... It... It would cost us about the same as it would cost for about -- hold on one second. I can't hear myself. But I'm glad you're fired up, though. I'm glad.

OBAMA: Everybody knows that it makes no sense that you send a kid to the emergency room for a treatable illness like asthma, they end up taking up a hospital bed, it costs, when, if you, they just gave, you gave them treatment early and they got some treatment, and a, a **breathalyzer**, or inhalator, not a breathalyzer. (crowd laughing) I haven't had much sleep in the last 48 hours.

Those that don't believe me, wn.com/Obama_Breathalyzer

Give the password holder enough Woodford until he/she will share the secret with you.
