Yes!! I use my blackberry to stay in touch 24/6 with the forum.

I hardly use the forum on a desktop. Looks way different and I do know of a way to make it look the same.

ClearEyes.

Its great to know that you know how to do it.

Now would you please tell us how?!

It would be helpful for me as well.

Reb B. got himself & his Wife new Toy yesterday "**A Brand New Black Berry**"

So if he seems extra excited its because of the BB.

And if he sounds a bit irritated, that too would be because of the new BB.
