

Post Bugs and Problems Here

Posted by the.guard - 14 Dec 2012 17:49

Since we just switched over to this new forum, we need your feedback! If anything doesn't work the way it should

- If you find a bug or problem
- If there are features you miss from the old forum that this one doesn't have
- If there are features you'd like to see on this forum

Please let us know! We have a team of the most professional developers who can fix/create

You can also let us know **by e-mail** at gye.help@gmail.com.

Thank you!

Reb Guard, I love your new improved avatar.
almost anything we ask them to. Don't be shy!

Google Chat tells you when the other person is typing which makes a more ordered conversation.

ok ive just encountered this weird problem: when i try respond to a PM, i write my whole long

megila.... and then... boom! - as soon as i press send, it just disappears and says, "You can not send messages to spouses"!

dov, i was trying to respond to your PM, i guess they're worried that we are up to no good together ;-) i guess we will have to wait till its sorted....

It would be even more better if somehow all the old PMs could be imported into the new site before they disappear forever...

We can't import them since it's a completely different system. However, you can access them by logging in to the old forum. We don't plan on ever deleting them.

How to access the old forum? While it's true that plain www.guardyoureyes.org/forum redirects to the new forum, however, if you add anything to the URL it won't redirect. We did that so we can still access posts on the old forum with direct links (since we do plan on removing some of the outdated boards on the new forum). So if you put in www.guardyoureyes.org/forum/? for example, you can still access the old forum.

guard, the link take me to the old forum, but as soon as i login, it diverts me back to the new site! (so i cant get to my messages anymore)

Don't log in from the homepage. Click into another page first.

@ BB

There is a small pencil next to the other person's name to indicate that he's typing. Though truthfully it doesn't always seem so accurate.

I can't see any pencil.

I tried sending a PM and it was rejected "Can't send to spouses"

The send-a-message screen says Warning: array_merge() [function.array-merge]: Argument #1 is not an array in
/home/guardyou/public_html/live/administrator/components/com_uddeim/admin.shared.php on
line 783

This was fixed.

The pencil appears in the private chaat window, next to the member's name on top. I hope to make it animated soon, so it stands out more when the user is typing.

Is there a reason why suddenly no one seems to have signatures under their posts?

PM's don't seem to work at all. Are they working? Is my filter blocking it somehow?

By the way, what happened to signatures. No one seems to have them anymore.

(I like Dov's "I do not particularly care exactly which "lav" suicide is. I'm not interested in it for
)

The forum has been very quiet since we moved to Kunena. Either The Guard has succeeded in doing away with the yezer hora for arayos (unlikely - I saw a woman this morning and I'm sure the yetzer was still active) or most of the users of the old forum were all Nechemya Webberman posting under dozens of different user names and he doesn't have Internet in jail.

other reasons!"

3 good points from the Shteeble.

There **is** a link to new replies to your posts, it's called My Replies.

Hint: If you use [this link](#) as your bookmark, you will see your replies first when you come to the site.
