_____

Someone just asked me if there is a GYE app for Iphone, he doesn't have a browser but apps work.

_____

Thanks, Pidaini, for putting out feelers on this. Do any of the upper echelon of GYE know if there are plans to make a GYE app? It seems like it would be a really good way to allow access to the site without the need of a browser. L'mashal, I found it easiest with the iPhone to just disable any browsers and if there is a specific app I would like, my wife can just let me temporarily open the app store. Anyone know how to "app"etize a site?

Thank you, Gevura, for the suggestion. I will look into that.
