

Bad situation -- Can anyone suggest medicine.

---

My life is full of stress. I have severe neurosis, I am unemployed, dependent, and under a great control and mental abuse.

I do not know if I still have the energy to fight against my erotic thoughts. I am afraid I am going to fall. What I greatly need is a list/suggestion of anti-aphrodisiac medicine or food. I am already taking licorice root, but it does not seem to work.
