Filtered Device Calendar - see 1st post

Posted by Markz - 19 Aug 2015 20:00

In this group, logging or continuing overtime on any non foolproof **FILTERED** device (i.e. that has any possible access to inappropriate websites / apps) late at night is not practiced.

Here is where we log dates and times only

- **How long you want to join for**
- **Your 'good night' time, and 'good morning' reactivation time**
- **Periodically update your calendar** if you want to extend, quit / take a break, or are jumping back on.

To review the rules, for questions, and to comment, please go to the Discussion Blog [HERE](#)

Summary

- Choose 10, 10:30 or 11pm.
- If you decide to login or continue after your 'goodnight time' you must first write a valid reason / excuse on the [Discussion Blog](#) why you feel exception should be granted to logon.
- If the reason is rejected by the forum group or administrator, we commit to pay \$5 knas to GYE.
- If we logon and didn't 'Write a reason', there's a \$15 knas to GYE the following day, regardless of whether we slipped to sin in the clutches of the web or not.

Please post all comments regarding the LOG calendar, in the [Discussion Blog](#)

Maybe try it for 7 days...

Night before last I went late JewTubing = kosher vids on open computer after the allotted time for 1/2hr and quickly got off

Thereafter being bored and very tired when on my "filtered device" I decided to check for some email to see just out of curiosity if there's inappropriate images I thought I saw sometime back and located the emails although the images weren't PG rated.

I just totally deleted them

If my filtered device would not be filtered I would have definitely continued and

If not for the commitment of this thread I would've gone back on my PC and found what I was ~~not, yes, no not!!~~ actually **YES!!!** looking for

Thanks guys and gye!!!!

I'm taking a 2-days-break Tuesday and Wednesday night, as I have to finalize something urgent, causing stress while unfinished.

Cordnoy has original ideas no one has thought of...

Balabos, maybe post here or on the device blog thread, or any other... while you're on your PC late at night, cos I'd do that

For me, not opening the internet browser at all seems to be more efficient than posting. Thank you all for rooting for me ...

Last night was a video whopper 613tubing

As long as someone is awake in the house I tell myself it's ok to be on... then I overstayed another hour... then I told myself 'you're gonna have to pay the \$15 in any case, so why not stay on another hour?

at least get your money's worth'

No X-rated stuff. And when something popped up, I followed the 30 second rule

Just sharing...
