

Filtered Device - Blog. See 1st post
Posted by Markz - 19 Aug 2015 20:09

Here's the plan

In this group, logging on any filtered device that has 1% possible access to inappropriate websites / apps, late at night is not practiced.

- Choose 10, 10:30 or 11pm. Any important use can usually be done after 5am when we are in a clearer frame of mind.
- Any device that is 100% foolproof internet safe e.g. with white lists to exclusive kosher sites (unlike regular filters) is not a problem.

How To Join The Group?

Please go to the [LOG Calendar](#) found on this link [HERE](#), and post only:

- **How long you want to join for**
- **Your 'good night' time**
- **Periodically update your calendar** if you want to extend, quit / take a break (cos the knas's are getting too expensive), or are jumping back on.

Write a reason on this Post

If you decide to login after your 'goodnight time' you must first write a valid reason / excuse here on this blog why you feel exception should be granted to logon.

- Only extraordinary or emergency situations can be approved - no working overtime / browsing / shopping etc.
- If your friend / wife is with you, that can be a valid situation.
- If the reason is rejected by the forum group or administrator, we commit to pay \$5 knas to GYE.

And if I forget?

- If we logon and didn't 'Write a reason', there's a \$15 knas to GYE the following day, regardless of whether we slipped to sin in the clutches of the web or not.

Please post ALL other questions and comments regarding the LOG calendar, in this Blog post.

Maybe try it for 7 days...

KOT!!

I don't usually think to post on this thread much at all, but when returning home late last night, I was highly tempted to go onto an unfiltered device long after my device gnite time. I almost posted my feelings of temptation, but didn't

Now I see I should have, so that I could've saved your gelt. Although I think gye is a great place to invest our \$

WHERE WOULD WE ALL BE IF NOT FOR GYE????? (do not answer)

I meant to put in serious work earlier on this unprotected device, but got side tracked by some nice friends of mine

Warning: Spoiler!

, so I think that's a valid excuse to allow me to stay on tonight for 1hr.

Any protesters - please raise your voices now - I need to work...

Ok?

Was the bill from gye?

If I'd be charged by gye for all my usage, It would take me more than 15 min to pay... ;-)

That's why you need just 1 filtered device, for after hours in the gye nightclub

Stillgoing, Yesod, and anyone else that would like to chime in - Id like to change the calendar shutdown devices to exclude reading / posting on guard your eyes dot com

This tool is something that has kept me in check, I need it, and would like to hear your thoughts - Am i opening myself to risk by telling myself 'im only logging on to access a shiur or gye...'

Either way - im letting you know im on here tonight past the shut down time so you know where i am...

I do have a \$15 due to gye for overstaying one night recently for work or other purpose...

(although I truly wish I was able to donate **\$15k** to gye I love)
