

ANYONE in Need of a PASSWORD???

Posted by aaron - 09 Nov 2009 20:33

---

Wanted to install k9, but too confused or embarrassed to ask for help?

Here is the answer to your prayers.....

I've discovered the greatest way to spread k9 web protection

**easily, without embarrassment and for FREE!!!!!!**

Using a special, easily installed, free program called crossloop, I (or anyone in the forum for that matter) can help install, make a password or alter k9 web protection.

I myself am more than willing to help anyone who wants this set up. I'm frequently online so I make a great partner to help others who need it to be bypassed. I check my mail frequently and am more than willing to help anyone who wants it set up.

Basically, all you do is download the program. E-mail me about what time you want it installed and we'll meet on the website together.

*Easy, no?*

The website is called [www.crossloop.com/ipage.htm?id=predownload](http://www.crossloop.com/ipage.htm?id=predownload)

My email is [extraemail564@gmail.com](mailto:extraemail564@gmail.com)

Feel free to visit my website [helpmestop.weebly.com](http://helpmestop.weebly.com) to other tips, advice and support.

I have much experience with k9, its settings and how people usually fall with it. I am happy to give recommendations in terms of settings to all who seek them.

I love GYE and couldn't thank them enough. That is why I feel such a strong need to give back and what better way than spreading k9?!!!!!!!!!!

Give it a try why wouldn't you? ??? ??? ???

Aaron, this sounds interesting. Thanks. Have you seen the instructions on [this page](#)? We use "ShowMyPc" to help people make adjustments... Is your plan better? I'm not sure I understand how this works... Maybe you should work together with our filter Gabai at [filter.gye@gmail.com](mailto:filter.gye@gmail.com)?
