

Internet Filter Issues

Posted by helpatlast18 - 26 Dec 2016 05:00

---

Hey everyone.

I would love to get an internet filter on my smartphone and laptop, but I am still dependant on my parents for money, and am terrified to ask them to pay for a filter.

Any free filters, or ideas?

There's a filter called qustodio that's free for one device...

What is holding you back from talking to your parents?

Welcome! I think K9 is also free. There are options. Have you done any research? What ails you? Do you think the filter will solve your "problem"? Just asking some questions to get an idea of where you are, and what you are trying to do. Please tell us more about your situation if you wish. Or maybe, you just came for filter advice, in which case, I hope you get it.
