

Best filters for an android phone?

Posted by Snow - 07 Sep 2017 13:35

Hi - I am looking for an easy to use filter for my android. I have used k9 on my computer for years and it is terrific. Ideally I'd like to still be able to use the chrome browser on my phone. I am located in Israel, but I understand there may be some solutions from abroad as well. thanks for any info you can provide.
