

Kosher phone

Hello everybody,

Still struggling here. I realized that 100% of my falls are on my phone. I used to have an old phone and all my falls were on computers. I managed to kosherize my computers (using covenant eyes / web chaver). The problem is that I have a smartphone and covenant eyes does not work well on it. I know blocking device is not the solution but I also know it is pre-required to do an effective recovery. Let me know what technical solution I can use to block this phone effectively. I need to get this phone under control to be able to move forward on the long term.
