thanks gibor kaari. you make some interesting points. i just want to say that i cant believe marriages were just made like that: boy meets girl and says harei at mekudeshes. IF it was done that way big if , i would only understand it that yidden grew up in the same city for generations and everyone knew everyone **very well** almost like family which is not the case nowadays at all unfortunately ,therefore its not doable anymore.

hatzlacha.
