---

Does non-religious music video that isn't Judaism that shows pretty women dancing or a woman singing love songs lead to masturbation and porn? I'm a Noahide by the way

Hello fellow Noahide, I didn't expect to see another one on here.

Yes that less explicit stuff will lead to p and m and in my experience I preferred to m to the material you describe over p. So even if it doesn't lead to p it *will* lead to m and it's assur to look at the material you describe to begin with. Listening to goyish music isn't also the best even without the visuals because the substance of audio can lead to arousal which will lead to p and m.

I'm loving this question.

?Are you looking for an objective reality answer? Will it? Will watching a woman walk lead me to run after her and rape her? Will hearing a woman sing on a CD in a supermarket make me go home and masturbate??

I'm a human by the way.
