

Looking for better Screen accountability software

Posted by Clarity26 - 12 Oct 2023 17:51

Please help!

BH Screen accountability has been a helpful tool for me. I've been using Webchaver.

Unfortunately I've discovered a loophole in the system. I've reached out to customer support through covenant eyes and they've told me that there is nothing they can do to fix this.

Does anyone have any recommendations and experience as to what software I can use instead?

Thanks so much

Is this for a phone or computer?
