

Advise

---

Hi

I need some advise. I have Spotify on a quin which has explicit music turned off but there are still super inappropriate music videos that just can't be blocked. I use Spotify for Jewish and Israeli music, podcasts and shiurim. But the music videos are causing me to fall again and again. I will delete Spotify if thats what it takes but surely there's gotta be a way of blocking the music videos either through the phone itself or through Spotify app. I really don't want to give it up but if I have no other option I will. What do the oilam advise?

Reach out to TAG or someone who really knows how to block things. And realize that if there is no eitzah, you may have to consider getting rid of it.

24/6 has all of the jewish music you can dream of and prob. all of the shiurim on spotofy too, if you're really only using Spotify for Jewish music and shiurim then 24/6 is all you really need.

For podcasts, if you're talking about political podcasts and the like there is a phone number you can call and listen to many of them. PM me and I'll give you the info I don't want to post it here because it can potentially be a huge time waster too.
