

Counting Total Clean Days

Posted by aaron - 04 Apr 2010 06:14

dearest GYE leaders,

would it be possible for the 90 day page to count a person's **total** days clean and not just the days since the last fall?

I second the motion.... Although I know that the admin has quiet a bit on his hands....

I think the idea is great because each and every day clean is meaningful unto itself.... A streak is great but is not everything....

The 90 chart keeps track of Cumulative Clean Days Since Starting; Longest Recent Streak; in addition to Clean So Far.

Check it out yourself: <http://guardyoureyes.org/woh/90day.php>

It DOES keep track of this!

If you were clean for 10 days and had a fall, you reset your main count, but you can still see your cumulative count on the chart! :D
