K9 fiter tips
Posted by ovadia - 11 Jul 2010 06:59

_____

I have had K9 installed on my computer for a while and it has really done a good job, but I found that even after checking off the various categories I could still "dig up" some inappropriate pictures through google image search, even though the site itself is blocked. (He is really good, the Y"H!! zaken verogil) I tried blocking images through K9 but that blocked all images including icons on GYE. After a number of attempts I overcame the problem like this: Besides for blocking categories, K9 also has an option to block specific sites. So I just plugged in "google images" and it did the trick without interfering with any other sites.

Later I received from the filter gabbai two other suggestions:

1. enable "force safe search" www1.k9webprotection.com/aboutk9/product-features

2. use adblock : www.guardureyes.com/GUE/Filters/blockPics.asp

I finish with a Tefila ??? ?????? ...... ?? ???? ?????

Hi Ovadia,

Hey could you tell me how to get a hold of the filter gabbai, I go to these proxy server sites and they're able to bypass my k-9, Any help you could give me would be more than appreciated, I have will power but a fence would be so much better

desperate for help

Benny

_____

Dear Benny,

The filter gabbai can be reached here. filter.gye@gmail.com . see this page www.guardyoureyes.org/?p=24 .

I hope that this will help you. If I can be of any further assistance either post here or send me a pm.

Chazak veematz

Ovadia
