

www.guardyoureyes.org HAS BEEN HACKED!?

Posted by aryehtahor - 20 Dec 2010 00:21

Does anyone have an explanation of what happens when you go to guardyoureyes.org right now? Turkish hackers? What? Stay away from the site for a while people!

The forum should be unrelated to the main site. I sent Guard an e-mail about the problem.

One thing is certain: There's a special place in Gehennom for anyone who messes with GYE!

My Antivirus software picks up 3 tracking cookies after visiting guardyoureyes.org

beware. make sure you have a good antivirus program on your computer, and make sure it's deleting those cookies.

Anyone for potato chips??

The site is up and running again, B"H.

I Oked Norton 360 to delete all tracking cookies - including most that I would have wanted to keep.
