

TaPhSiC method in halacha

Posted by 3munah - 23 Jan 2012 16:18

Hi

I've just read about the TaPhSiC method, it sounds amazing.

I'm just worried about the halachic side of making a shevua with Hashems name.

The article here says that Chazal allow such a shevua in order to control our yeitzer for arayos. Could someone please point me towards some halachic sources which support this?

Many thanks!

Thanks everyone for the warmth, enthusiasm and info, may Hashem give you much koach and success in banishing this yetzer.

I understand from the above that there is a haskama from Rav Aharon Feldman shlita on the handbook which includes the TaPhSiC method.

Does anyone know of written sources which discuss this type of shevua (like shulchan Aruch)?

Obviously we receive piskei halacha from our Rabbanim, however its important to learn the sugya inside as well

Thanks!
