Is it tough to be a jew you're saying, or are you just saying that it's tough to live a healthy productive life?

Hi,

To everyone who responded, thank you from the bottom of my heart!

...and forgive my awkward introduction.

(There is, of course, no graceful way of introducing oneself in such a situation.)

However, be that it may, allow me to clarify--it is not the burden of G-d's yoke under which I strain--not by a long shot.

If anything, it's the other way around.

I am painfully coming to the realization that the stance adopted by the modern world on Tzniut, namely "anything goes"--is nothing but pure rationalization.

That obviously is true for most of the secular world.

It is unfortunately somewhat true of the "moderate" religious world, as well (of which I am affiliated though somewhat disillusioned).

It isn't true of non-secular goyim, by the way, many of whom are just as appalled by the way promiscuity has been transformed into "freedom" since the 1960s.

If something is easy to achieve, like the plattitudes that have been promoted in place of modesty since that era, then they're probably not terribly worth pursuing.

Hence my observation that being a Jew (as opposed to playing the part) is hard.

(There must be a deeper reason why it is rejected other than the rationalizations given.)

Bards it might be hard but goyim do not have LICHAIM!!!!

There is so much Joy in being a Yid that when we find that Joy the evil vanishes (see Reb Tzadok on Succos)

I'd love to hear more, but for me personally, bein' Jewish is easy; the difficult part is livin' life as a man (and marriage vows also get in the way).
