---

Hi i would like to introduce my self.

I being around here for a while but I never posted before.

I joined the 90 days chart and is being a life changer.

I get a lot of chizuk from all of you.

Even though things are better, than before finding this site and join the chart, I still get this nagging feeling of just look into something, not terrible pornographic, but I know we're all will end. Any suggestions how to deal with that?

No, I don't think was Purim. I Actually always wander was first. I want to get into the watching porn mode, so therefore I start sliding, or the other way around. Because I start sliding, I end up watching porn.
