

Technical advice re the forum?

Posted by shlomo613 - 03 May 2015 20:13

Hi guys,

I'm losing track of all the messages and posts that I like to revisit one day.

Can someone please advise me how to do this.

Also, I lost serenity's advice how to post a link into one's signature. (I figured how to put in the whole long web page address, but I don't want all that to show). Can someone please post here guidance for the record how to do this?

Maybe this thread can be for technical advice re the forum.

All the best.shlomo

Ok try to paste this on your signature. The one you have now sends people to serenity's forum, (not a bad idea, but not what you had in mind:))

[A fresh start](#)
