

My Story - Thank Gd

Posted by Markz - 17 Sep 2015 00:27

Hi guys!

(Please see my share lower down at end of page 1)

I've been wondering if people with weak communication skills as I have are more vulnerable to the lure of pornography (See [this link](#) for example), and if unique non-standard steps would be suggested for us to get out of S* addiction.

BH I have a great job, kids...

I also have a good therapist, but have been hesitant to ask about this yet.

I'd love to hear feedback from anyone familiar with the topic. ZemirosShabbos? You mentioned it some time back [HERE](#)

Thanks

Mark

Balabos, I hope you see this thread too (I know you're a partner with me on the [Filtered Device Calendar](#))

I was supposed to do some online work, but something urgent came up, and **needed to get seen to first** - updating my signature

Maybe signatures are dissapearing too? So Guard isn't kidding... - The website is going underwater cos no-one called Dov??

So i'm going online now to do my work after the device hours - wish me the best, and I wish you all too!!!

Guess I'm normal - what's that?

I awoke in middle of night and tried to sleep. In half sleep / daze I had silly fantasy dream and fell

I heard myself saying "stop" and I did, but a little too late... ;-(

If not for gye I would have gone to some silly porn sites this morning, because naturally after a fall the fence comes crashing down too

For that alone GYE is worth more than gold thanks to the.guard!!!!!!

Should I consider it a fall and restart my date?

I don't care to, however I define a fall as a fully conscious act which imho this wasn't...

Around here it's normal to be not normal

I heard myself saying "stop" and I did, but a little too late... ;-(

If not for gye I would have gone to some silly porn sites this morning, because naturally after a fall the fence comes crashing down too

For that alone GYE is worth more than gold thanks to the.guard!!!!!!

Like everyone else said, you're definitely not normal- you're way better than normal and that's why we love you!

As for your fall, pardon my density, but is this a keri that happened when you were half asleep or you actually masturbated, just half asleep? First is definitely not a fall, the second sounds like it is.

But do whatever will help you keep on going!

Firstly, thanks for sharing. It can be hard to do in these situations. I remember when I relapsed after 9 months. Secondly, I don't buy into this whole wet dream/half asleep masturbating business. If I'm not conscious then it's not a fall. I can do that every night of the week and it's still not a fall. Maybe I need to think about why it's happening, but nevertheless I'm still sober. It could be that GYE would say it's a fall. I don't know.

Love you, man. Keep up the great work.

[Markz wrote on 08 Apr 2017 22:59:](#)

I went to my local Tag office to get iTunes restricted

So a sweet guy there tries to install a program for me on his computer but gets stuck because his program is locked with parental controls and he didn't know the password (until he reached a supervisor)

Oh no... here it goes again...

Why did I go to tag?

Because iTunes Radio cannot be locked by my own brute force

TAG to the rescue!!

Im very appreciative for TAG rep helping me - and they don't charge for that service

Fellow told me they couldn't do anything with my old version, and needed to update the IOS

I updated it and Tag setup everything perfectly

Tonight I found a totally different program which due to the apple update now allows inappropriate stuff

Its like never ending...

I don't want to cause any of you to put on slippers but this 'program' is system standard in all iPhones so I can't tell you today what it is...

If tag helps me fix that I'll let you guys know ;-)

Markz,

I had that issue just recently with a bunch of new apple updates and tag was able to do it for me, and one I was able to do myself. I'll PM you with which ones and if that's it, you can let me know, and if not, don't tell me.

Markz,

I'm not a apple fan so don't know the latest about iOS, however just my 2 cents based on my

experience in the past.

What were you using to try to restrict xyz..., was it the built in restrictions?

Apple makes a tool called apple configurator which really allows full granular control over every aspect of the device. Perhaps try that.

p.s. Only the Mac version gives you full controls. The Windows version is watered down.
