hi yakov or whoever will read this.

?i grew up in an abusive atmosphere my mother would beat me, i was bullied in school and one of my rebbeim picked on me and got my whole class to laugh at me. i was in therapy for the resulting problems for quite some time. i still see a therapist from time to time. at one point for two years i was taking meds a generic for Zoloft. that's my emotional history.

as for the kedusha problems I've been masturbating now for 13 yrs.. i have spoken to numerous rebbeim who tried to help me along the way. they weren't really equipped to deal with me. eventually i discovered porn but baruch hashem i always had limited access. i still have relapses in porn which are hard to get out of. i'm now married bh and i have a daughter bli ayin hora. please help

not sure how you'll contact me my email is [mikefineroth@gmail.com](mailto:mikefineroth@gmail.com) (not my name and i don't know anyone with that name)

hope we'll finally break free

I'm in the pits. I rationalize that "OK I'm back to regular". I'm gonna daven for the ability to be completely honest with myself and understand my 1st step properly (just how dangerous porn masturbating etc. is for me).

will try to keep everyone updated.

Did something happen to make you depressed? That will kill your motivation dead (your motivation to work the 12-step program.)

Wednesday, I regressed in my recovery. I decided that if I'm not getting sober anyway I can skip a meeting. (talk about insanity). At the time that I would've been at the meeting I went cruising for a half-hour. I almost crossed a very big red line. Needless to say, I felt dirty, low and bad. I felt like an animal.

Yesterday (Thursday) I went to my therapist. He proved me that I'm a good person and said that if I understand that I'm a good person and connect with that by taking even SMALL positive actions the rest will come by itself. He actually learned with me an *orach chaim* by the story of kayin and hevel that says this.

Did he discuss with you some biofeedback tool you can use every day to keep you from going after your next high, and low?

I think there's a misconception about dopamine. Dopamine is the hormone that induces craving. It's the hormone that will tell me that I'm going to feel pleasure soon. But it's not a pleasure hormone. Serotonin is the main pleasure hormone. So unless you really enjoy working out, there won't be dopamine. Sorry for the all the science. A bit of a nerd here.

This nerdy discussion interests me.

So when does the dopamine hit? And can I sneak some into my wife's ginger ale?
