

Darke hajetzer

Posted by benben5 - 09 Jul 2017 19:31

for my work i need the computer and my office is at home.

my wife helps me a lot so i can learn most of the time but as known the jezer hora is in the todays computer. i have no smart or i-phone. (after i had it a years ago for a very short time and realise how much it takes away from yiddishkeit and brings a lot of bitul zman.

but i have a laptop which someone install for me with the k9 - but offen i looked up in the youtube films - more and more. so i looked for a new laptoB which i gave in to the TAG office and on which they blocked me also the youtube and any possibility to see twitter etc. (which i never used)

but just before i get the new computer the yetzer hora bring me on the main office computer - how is also blocked through TAG - to see twitter with very bad pictures and films. i didnt get back to the TAG that they should block me on the main computer the twitter possibility because i didnt want to chap ????

so thats where i am now - when one computer is blocked the jetzer hora open another window to gehinom.

thank you for your forum and help that i hope to get from here - tisku lemitzvos

Filters on computers are useful.

But one can get round them.

It is more important to tackle the yetzer hora and anything else which makes you lust.

What makes you want to look at these images?

What triggers you?
