

Untested waters

Posted by chancy - 05 Mar 2020 16:12

Hi all,

First a bit about me.

Started M as young boy of probably 9. P at the 13-14. Had multiple partners as bucher is yeshiva.

Got married issues didnt get any better. struggled for years. Untill i found GYE BH! Anyway. the last year has been the cleanest year in my life.

I have the best filters everywhere, stopped watching any movies, stopped listening to any goyishe music. Not reading any non kosher or goyishe entertainment sites. And my triggers of course dropped dramatically. Im much stronger in fighting any urges. This is the good portion of my story.

Now to my issue, im very stressed in my life. Have a lot going on.

Usually i would release with M and P. cant do that anymore.....

At least i could have sex with the wife, thats not happening.....

. But we are not doing it out of fear of getting preg. We just had twins and live in a tiny house and the fear of getting preg is just too much. If we do it, we are both nervous wreck untill she gets her period when we thank hashem. So im very stressed, my clean streak is ulmost my longest yet and im not getting any kosher either. my brain is going mushy literally.

So i feel like my brain is revolting since im not giving it any pleasure outlets.

i fear that ive repressed too much and its not healthy. What do i do now?

Speak to a Rov, there may be permissible ways to avoid pregnancy in a case of need.

It sounds as though the bulk of the problem you are seeking advise on is the stress in your life. I would suggest talking about all of that stress-it will help get it off your mind. Additionally, a good tool is to exercise/walk outside to clear your head

Just to reiterate what Gevurah wrote, it's really worthwhile to speak to a Rov about contraception - there are plenty of kosher options available.

I follow a very machmir Rov. You'd be surprised how far he goes so as to preserve Shalom Bayis. I'd bring him very suspicious (to me at least) ketamim and he would say they're tahor (he's an expert in this area). Don't be quick to abstain. People may actually think it's machmir or heilige to forego relations with the wife whenever possible, but it's just the opposite. You're being mevatel a very important mitzva even if you're not going to conceive anyway. Not to mention, it's a big trigger, to abstain. Speak to a Rov immediately. Nowadays most will allow for contraception for a number of different motives.
