Hatzlacha rabah!

Get a partner here on gye and be 100 percent open about whatever you see. I did it a month ago and was ????? ?????

Avoid it AS MUCH AS YOU CAN. only do something on it if you reall really really really really really really really really need to.

It's only two days. Hang in there!

Get a partner/mentor to touch base with before you go near the device/whenever you could potentially fall, and touch base afterwards that you are still clean. Its a must!!
