A cleaner Youtube

Posted by kidushashem - 27 Sep 2011 00:10

_____

For those out there who feel they must watch youtube videos sometimes, there's an excellent extension if you use chrome or safari as your browser.

It basically turns youtube into a clean page, with just the video you're watching. No video on the side, not comments, nothing. Just the video you're meant to be watching.

Here's the link for chrome:

chrome.google.com/webstore/detail/gpmpangiimbdkhbhmbbhkplffgkiomkh

And for safari:

clea.nr/

If someone understands that this might be good for them but are not technologically oriented, please feel free to pm me or respond right here on this thread...

hey steve, you probably tried the first ling for google. For some reason it's not working.

Did you try this link? clea.nr/

if you can enter that link, click the install button at the top of the page. then, click the link corresponding to your browser. which browser do you use?

let me know if you have any trouble.

_____

sure.

There are a bunch of really great extensions out there to help with stuff like this.

I just found a new extension called "Hide Images". Have you ever been on a website that you really wanted to be on but it had inappropriate pics/ads? I hate that feeling of guilt and internal struggle. This extension will remove all pictures on the page you're viewing, with one click and it sits right in your toolbar.

www.hideimages.net/

_____

@kidushashem,

K9 blocks your link categorized as: Proxy Avoidance

(maybe get a filter...)
