Looking for a filter
Posted by eli613 - 14 Jun 2018 05:34

_____

I am looking for an internet filter on my Android (Samsung Galaxy S8) need it to be free, nothing too fancy, just need something that will block porn or shmutz related sites.

_____

The only real filters that work on a Samsung Galaxy S8, are Gentech (Works really well on Samsung phones) and Netspark both of which are not free. You could also try Truple if you have an accountability partner.

_____

I hope you don't mind me hijacking your thread, I need a good filter for a Microsoft Lumia Windows 10 phone. I have not gotten a good suggestion from anyone yet including Venishmartem (they didn't reply to my email). Would Truple work? Though I don't have an accountability partner at the moment.
