Accountability Recommendations - beside WebChaver
Posted by Phill Up - 01 Jul 2020 14:20

_____

Hello all,

Hope everyone is appreciating their day and embracing what we all truly want in life.

I'm looking for an accountability software that will not conflict with GenTech on my Macbook and Windows Surface nor conflict with Netspark on my iPhone. Unfortunately, WebChaver would conflict with Gentech, according to someone at WebChaver. Any recommendations would be much appreciated. Thank you in advance!

_____

Thanks for the recommendation. I'll look into it. It may be more along the lines of texts rather than web browsing though, but I will double check.

Hello, I am looking for monitoring software, and I am wondering if you have any
recommendations? I have Gentech on my Android, and I have heard that WebChaver is
compatible with it, but I have Techloq on my Windows, which apparently doesn't work with
WebChaver. Thank you!
