

Telegram Caution

Posted by future paltiel - 28 Nov 2022 04:07

Hi Fellas,

I recently noticed that Telegram has an open search option throughout the enature application allowing to view any other users or groups. You all guessed wherein can lead. I called Netspark and it turned out that the application on my phone was set to a *Light* filter and they switched it to *Moderate*. B"H this solved the issue.

If you have any doubts pleas take the time to check it out to avoid unwanted trouble.

Thank you for your cooperation.
