Webchaver for Mac
Posted by levaryeh - 31 Dec 2024 11:08

_____

I would like to put webchaver on my Mac but I think it is not compatible with Mac + my filter (Netspark) does anyone know of another option like webchaver that is compatible with Mac & Netspark ?

thank you

_____

1. If I may, I would recommend to change to [Gentech](#) I know of a few work-arounds on Netspark, and I emailed them but they weren't interested in fixing it
