eed help asapwhich filters are discreet? osted by justdoit - 28 Jun 2011 13:26	
i,	
noticed someone on the computer was going to really inappropriate sites, and I realzied the nly way to stop that person was to install a filter. However, I can't have the person figure out at I did thatthey must just uninstall it or get mad at me for installing it. You see, they don't now that I know!	
ny help?? What about the k9 one? I have hours left to install one before they come home s scary how messed up people can get from the internet.
