Some funny quotes

"Why does Sea World have a seafood restaurant?? I'm halfway through my fish burger and I realize, Oh man....I could be eating a slow learner."

"I'm in no condition to drive...wait! I shouldn't listen to myself, I'm drunk!" -Homer J. Simpson

"I do not like broccoli. And I haven't liked it since I was a little kid and my mother made me eat it. And I'm President of the United States and I'm not going to eat any more broccoli." -George Bush.

"You have to stay in shape. My grandmother, she started walking five miles a day when she was 60. She's 97 today and we don't know where the heck she is."

"The pen is mightier than the sword, and considerably easier to write with."

"Sometimes I lie awake at night, and I ask, 'Where have I gone wrong?' Then a voice says to me, 'This is going to take more than one night.' "

"On my first day in New York a guy asked me if I knew where Central Park was. When I told him I didn't he said, 'Do you mind if I mug you here?'."

A joke

1)A young Jewish man was visiting a psychiatrist, hoping to cure his eating and sleeping disorder. "Every thought I have turns to my mother," he told the psychiatrist. "As soon as I fall asleep and begin to dream, everyone in my dream turns into my mother. I wake up so upset that all I can do is go downstairs and eat a piece of toast."

The psychiatrist replied, "What, just one piece of toast for a big boy like you?"

Next, he put the magnetron tube near an egg. Spencer was joined by a curious colleague, and they both watched as the egg began to tremor and quake. The rapid temperature rise within the egg was causing tremendous internal pressure. The curious colleague moved in for a closer

Mr. Rogers is an ordained minister.

actually Mr. Rogers WAS an ordained minister. He died. And I knew that when I used to watch)

look just as the egg exploded and splattered hot yoke all over his amazed face.

The average person falls asleep in seven minutes.

I guess I'm not average.

tired driving is a major cause of crashes, and it can impair the human brain as much as alcohol can. According to a 1998 survey, 23% of adults have fallen asleep while driving. According to the U.S.D.T. male drivers admit to have fallen asleep while driving twice as much as female drivers. Maybe because we drive more...

In the United States, 250,000 drivers fall asleep at the wheel every day, 54% of drivers said they had driven while drowsy 28% saying they had actually fallen asleep while driving. Drowsy driving is a factor in more than 100,000 crashes, resulting in 1,550 deaths and 40,000 injuries him tie his shoes over and over again (didn't you just love his train set!!!)

There are 336 dimples on a regulation golf ball.

Anywhere between 300 and 500 is normal. I just counted 200 of them and they all came out different! (That happens when I'm counting the pennies in my pushka too!)

The average chocolate bar has 8 insects' legs in it.

The average human eats 8 spiders in their lifetime at night.

Same as above! You might consider closing your mouth when you sleep, or take longer than seven minutes to fall asleep, so you can watch for the spiders better.

A cockroach can live nine days without its head before it starves to death while living in E'Y I personally have taken part in many "jook" decapitations. They ALL died. Maybe if they got their legs tangled in a chocolate bar they absorbed the nutrition that way freeing the spiders to crawl into the mouth of the sleeping (7min) speaker of the house. No wonder he couldn't talk! Maybe if he swallowed some golf balls (all 336 dimples included) with his squid eyes open while sneezing, he might microwave his pocket including the dime (how did he get u.s. money) erasing the 118 ridges around it.

Pinocchio count.

In England, the Speaker of the House is not allowed to speak.

The speaker in the House of Commons is the chairman. His role is to keep the debate flowing and to make sure that the rules are followed. The speaker is supposed to be impartial, even though he is a member of one of the political parties, and so they do not get to give their own opinions on the debate. Honestly though, I think we would do a lot better in the u.s. if they had the same rule.

Can I make that rule for the Speaker of my house?

The microwave was invented after a researcher walked by a radar tube and a chocolate bar melted in his pocket.

Well, it was a little more than that. It was during a radar-related research project around 1946, when I was a little boy that Dr. Percy Spencer, a self-taught engineer, noticed something very unusual. He was testing a new vacuum tube called a magnetron when he discovered that the candy bar in his pocket had melted. This intrigued him, so he tried another experiment. This time he placed some popcorn kernels near the tube and, perhaps standing a little farther away, he watched with an inventive sparkle in his eye as the popcorn sputtered, cracked and popped all over his lab.

Next, he put the magnetron tube near an egg. Spencer was joined by a curious colleague, and they both watched as the egg began to tremor and quake. The rapid temperature rise within the egg was causing tremendous internal pressure. The curious colleague moved in for a closer

Hence the expression "Egg on his face"

And the power of lasers was discovered when a scientist walked in front of one and it sliced off his tie. Good thing he was wearing a white shirt, the energy reflected off of it but the dark tie burned through. Ever since, all scientists wear white coats. Maybe that's why Yeshiva guys wear white shirts too

Mr. Rogers is an ordained minister.
actually Mr. Rogers WAS an ordained minister. He died. And I knew that when I used to watch)

The average person falls asleep in seven minutes.
I guess I'm not average.

That's why i keep all my drives to 6 minutes or less.

There are 336 dimples on a regulation golf ball.
Anywhere between 300 and 500 is normal. I just counted 200 of them and they all came out different! (That happens when I'm counting the pennies in my pushka too!)

The average chocolate bar has 8 insects' legs in it.

I think I've just been cured of my chocolate addiction

The average human eats 8 spiders in their lifetime at night.
Same as above! You might consider closing your mouth when you sleep, or take longer then seven minutes to fall asleep, so you can watch for the spiders better.

I'd better stop sleeping, I might get addicted to spiders.

A cockroach can live nine days without its head before it starves to death while living in E'Y I personally have taken part in many "jook" decapitations. They ALL died. Maybe if they got their legs tangled in a chocolate bar they absorbed the nutrition that way freeing the spiders to crawl into the mouth of the sleeping (7min) speaker of the house. PART 3

A polar bear's skin is black. Its fur is not white, but actually clear

Elvis had a twin brother named Aaron, who died at birth, which is why Elvis' middle name was spelled Aron; in honor of his brother.

Donald Duck comics were banned in Finland because he doesn't wear pants.

More people are killed by donkeys annually than are killed in plane crashes.

Stewardesses is the longest word typed with only the left hand. Shakespeare invented the word "assassination" and "bump."

If you keep a Goldfish in the dark room, it will eventually turn white.

PART 4

Women blink nearly twice as much as men.

Right-handed people live, on average, nine years longer than left-handed people do

The sentence "the quick brown fox jumps over the lazy dog" uses every letter in the English language

The continents names all end with the same letter with which they start

TYPEWRITER, is the longest word that can be made using the letters on only one row of the keyboard

The word racecar and kayak are the same whether they are read left to right or right to left

A snail can sleep for 3 years

Vatican City is the smallest country in the world, with a population of 1000 and a size of 108.7 acres

Did you know you share your birthday with at least 9 million other people in the world

"I am." is the shortest complete sentence in the English language. No president of the United States was an only child

American Airlines saved \$40,000 in 1987 by eliminating one olive from each salad served in first-class

The electric chair was invented by a dentist. (does that really surprise any of us?)

Now I'm waiting for my gabai to give pirush rashi on part 3-4.....
