Posted by peloni almoni - 12 Aug 2015 03:54

cornography *n*, [kor-nog-ruh-fee] - an intense display of corny or clever jokes, commonly used in various kinds of recovery

side effects of viewing cornographic images will include laughter, rolling of the eyes, the occasional snort, and general irritation. extreme cases were known to include diarrhea, coughing, vomiting, and well...

[spoiler][spoiler]

if you experience any symptoms for more than 4 hours, you're welcome.

HISTORY OF CORNOGRAPHY -

i am a firm believer in this. and i am sick and tired of posting on other people's forsaken "just having fun" threads that cordnoy keeps reviving from the dead. i am getting increasingly depressed by posting on the depressed person's chill spot, and i feel like i already ate and digested all the "chulint" i could handle. hell, i even made an ??? ???

sooooo, i am starting my own blog, that will, at least for some time, be updated and active, but hopefully be interactive. i encourage everyone to PLEASE PLEASE PLEASE help, as humor therapy should be a group effort. you all have talent - I'VE SEEN IT.

~~cordnoy~~cordnoy is so good at it, that if this were a corny army, i would appoint him ...

Warning: Spoiler!

rabbosai, the indians called corn "maize". they must have thought corny jokes were just "amazing". but my motto for this blog is - **NO JOKE IS TOO STUPID**. you have my word that i will at least try to laugh at every attempt at humor that anyone makes here. feel good that you may be giving me or someone else chizuk - or at least you will be annoying "the urge" right out of them.

so friends. romans, countrymen, give me your EARS of corn...

BRING OUT THE POPCORN, LET THE SHOW BEGIN...

[zemmy, if you're reading this, let it never be said that i do not take my ?????? seriously. ?' ??
?????? ?????? ?????? ?????? ???]

I agree with you Shlomo. But this N stuff is a bit.... Everything comes in different forms, but what's inside is no less valuable. imho

I love the way you post about the inside being the ikkur and then put a picture of corn where the inside is absolutely useless. Also notice how stillgoing liked the post. Just saying.

I do not endorse corn, warts, root beer or th Ford focus.

Inna, there you go again stereotyping the corn. Why are you judging the inside based on the colour of its skin.

It's actually called blue corn (also known as Hopi maize) and It's a variety of flint maize grown in Mexico and the Southwestern United States, particularly in the states of Arizona and New

Mexico and **different varieties of blue corn range in color from powdery gray to nearly black.**

It was originally developed by the Hopi, and remains an essential part of Hopi dishes like piki bread. Blue corn meal is a corn meal that is ground from whole blue corn and has a sweet flavor.

In addition to its sharply different color, blue corn has several nutritional advantages over standard yellow or white corn varieties. It contains 20 percent more protein and has a lower glycemic index than white corn. When used to make tortillas, blue corn produces a sweeter, nuttier taste than yellow or white corn, and is a more complete protein source. So, it's actually

Besides being the backbone of their diet, blue corn represents an essential part of the Hopi culture. The Hopi associate the ears of six colors of corn with the solstitial directions, plus the above and the below. Blue corn is associated with the direction of winter solstice sunset (approximately in the southwest and called Te'v?ña in Hopi). The Hopi also use blue corn in the naming ceremonies of infants, who might not receive their name for six to eight months. They believe that blue corn represents a long life; Hopi men ate blue corn before undertaking long journeys because they believe it gives them great strength. To this day, the Hopi believe in the

Think you've never eaten blue corn before, how do you think those natural blue chips got their better than it's yellow friend color from without food coloring

Just sayin
