My question is about more than iPhone

Are any of you accessing gye on mobile device now?

I'm on a laptop now. I can move it around. Does that make it a mobile device?

Btw, mark maybe those gifs in your signature is what's making your posts so data heavy. Try taking them out and see what happens.

ooh ooh pick meeeeeeeee!

If you are not on WIFI can you do me a favor

look at your cellular data usage amount, then, write a quick post here, then go back and check

the amount of data you just used and let me know. Ok?

**New editor eats my data :-)**

**Has anyone experienced the same?**

**The new editor uses 20MB of data per post** which essentially caps a limit in my phone to write no more than 1 1/2 posts a day

I have a 1000MB data plan

If I post 39 posts, or 1 1/2 posts a day I have used 780 MB of data

Can we have the old editor back please

I had to go onto a PC to write this, as my Data allowance is maxed out :-)

Testing quote data usage
