

Testin' the New Editor

Posted by cordnoy - 07 Feb 2016 18:21

We thank Guard and his team for updatin' the site and the editor.

There are many new features to make it easier.

There are, however, still kinks as well.

In this post, there will be a list of questions, suggestions and error reportin'.

As a thread goes on, the post gets lost.

Accordin'ly, I will be doin' as follows.

If you have an issue, question, answer, comment, or whatever, email it to me:

thenewme613@hotmail.com.

I will then add it to this post.

All other posts on this thread (other than Guard's) will be deleted, for it will not be orderly, and then it will not get fixed.

Thank you

1. the "quote" feature needs to be fixed.
2. the "source" button needs to be explained.
3. the "quote" button on mobile version needs an overhaul.
4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code

Warning: Spoiler!

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: <http://tiptipa.org.il/template/img/benefits-2.png>) and sometimes it doesn't (like this IMAGE: <http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1>)

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

9. Tried to attach file - didn't work

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code. For example:
`color=#FF0000?? ??? ????? ????? ?" ???? 2 ?????? ??? (120 ?????) ?????[/color]`

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

This post will be constantly updated.

Thank you

UPDATE

As it wasn't lettin' me quote or edit, i needed to copy, reply and paste:

1. the "quote" feature needs to be fixed.
2. the "source" button needs to be explained.
3. the "quote" button on mobile version needs an overhaul.
4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code

Warning: Spoiler!

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: <http://tiptipa.org.il/template/img/benefits-2.png>) and sometimes it doesn't (like this IMAGE: <http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1>)

6. the "strike thru" button is not workin'.
7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".
8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.
9. Tried to attach file - didn't work
10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).
11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that? UPDATE: this still does not work.
13. The yiddish site is showing me BOTH editors. The old one AND the new one!
14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code.
15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.
16. The red arrow doesn't show up right away after a quote on mobile. It takes it about 4-5 second to load. There is a delay on regular site as well.
17. I want to select a word on the mobile to add formatting to it (bold, link, whatever) but it doesn't let me select the word. Please make it that if user double clicks on a word, it selects it (like it works everywhere else on phone).
18. On iPhone - If I hit quote on thread one and want to copy it to a different thread, and hit reply on thread #2 and paste it there, it usually doesn't display correctly.
19. If I hit quote on a thread, there's no option shown to reply below the quote UPDATE: this might be only for I-phone, as the other mobiles have that red arrow thingy show up after you click below the quote.
20. quote inside a quote, breaks the quotes.
21. Mobile- when all text is selected, the last rows of tools aren't available, as they're covered by the "copy - cut - paste" mobile header.

This post will be constantly updated.

Thank you

Does anyone know if # 12 has been fixed?

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

You can reply here, as I will delete your response and my question (if I hear that it has been fixed).

Thanks

Re: Testin' the New Editor

Posted by Gevura Shebyesod - 07 Feb 2016 20:45

You deleted my post wheile i was quoting it in a reply. So when i submitted it it threw an error

- -reply-: An invalid post ID was requested.

then it kicked me back to the reply editor box with the (now orphaned) quote still there but the rest of my response was missing.

Thank you Gye for making the Forum much nicer and easier.

It's nice to see every once in a while something fresh and new.

Much continuing Hatzluche.

Since the change I don't have spell check.

Does it have to do with me?

Reb DT, I don't believe it had spell check previously

Reb Cordnoy

#12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that? UPDATE: this still does not work."

This is more complicated than in sounds

You realize that it has been like this for many months or perhaps years?

See [HERE](#) for example

The reason it was automated like this is simple

It was set to automatically include the authors name with the word "wrote", in every quote. However this should be changed if possible, that the "" quote tool should not include the word 'wrote', whereas when a poster's words are "quoted", it should include the posters name and the word 'wrote'

I have one small tiny minute request - I feel some changes in your list are nice features, but some are really essential, eg #9 attach file, like what's Yechida gonna do till that gets back up? Can we prioritize the essential ones?

1) On PC: Posting regular reply: When completing the post I may go back and forth from source to regular (making a change in source view, then making change in regular view), often on the 3rd or 4th time that i go back to make a change in regular, or to change in source - all the content **disappears**

2) On PC: When I hit "Quote" on this post lower down this page [HERE](#), all the content **disappears**

=====

Re: Testin' the New Editor
Posted by markz - 09 Feb 2016 06:00

4) On PC: 'Quick Reply':

If editing tools are applied the post often wont 'post' when 'submit'ed, rather just dissappear

I had added the simple color and size options as shown in my long reply [HERE](#). When I hit submit, I got an error on top of the page

message: This field is required

Sir - Which field?????

I knew there were editing problems and BH I copied all before hitting submit, otherwise all that i drafted wouldve gone with the wind

I no longer can insert an attachment into the body of a post. There used to be an "Insert" button next to the attachment path box, it's gone now..

Re: Testin' the New Editor

Posted by cordnoy - 10 Feb 2016 05:32

I'm sorry I have been negligent updatin' this thread, but I can't do from phone, and I haven't had a chance lately in front of a pc.

[markz wrote on Unknown:](#)

That was point #9

I can attach a file, I just can't embed it within the post itself.

Re: Testin' the New Editor

Posted by markz - 10 Feb 2016 13:44

QUOTES - breaking

WHY?

There's a new piece added to the quotes which is breaking the quotes and that is

date="

It's a nice thing to have, but when it doesn't pull in the date, the quote falls flat.

Here's a regular quote breaking for that reason

I no longer can insert a.. body... next to the ... box, it's gone now..
