Testin' the New Editor
Posted by cordnoy - 07 Feb 2016 18:21

_____

We thank Guard and his team for updatin' the site and the editor.

There are many new features to make it easier.

There are, however, still kinks as well.

In this post, there will be a list of questions, suggestions and error reportin'.

As a thread goes on, the post gets lost.

Accordin'ly, I will be doin' as follows.

If you have an issue, question, answer, comment, or whatever, email it to me:
thenewme613@hotmail.com.

I will then add it to this post.

All other posts on this thread (other than Guard's) will be deleted, for it will not be orderly, and then it will not get fixed.

Thank you

1. the "quote" feature needs to be fixed.

2. the "source" button needs to be explained.

3. the "quote" button on mobile version needs an overhaul.

4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code
Warning: Spoiler!

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: http://tiptipa.org.il/template/img/benefits-2.png) and sometimes it doesn't (like this IMAGE:http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1)

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

9. Tried to attach file - didn't work

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code. For example:
color=#FF0000**?? ??? ???? ???? ?"? ??? 2 ????? ??? (120 ?????) ????**[/color]

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

This post will be constantly updated.

Thank you

_____

I hit reply twice

The first just was submitted, let's see if this second one works

_____

Seems I can't test it myself replying twice to same post

It needs to be 2 separate users

Any volunteers?

Please PM me

_____

OBSOLETE POSTS

Many times a thought out well written submitted post results with a blank page and all the writing was lost

This happened many times to me, when someone else and myself hit 'reply' to a post simultaneously, but he hits 'submit' before me

His post is posted and mine results with a blank page

Cordnoy has had that issue often, and I'm sure many others suffered from it as I have

My idea was perhaps if replies are automatically set as "reply topic" and not "reply post", then no obsolete pages result

Shea please test it out

_____

I have experienced that in the past.

Whats about having drafts?

Sometimes we are holding in middle of writing a long post and woops we have to close the window and we loose everything.

something similar to that we have in Gmail.

_____

The number option ~~lust~~ list doesn't work

In editor mode it looks cool, but submitted doesn't show list count as i'm testing for you right here

1. One
2. Two
3. Three

If you're interested to fix it, see en.wikipedia.org/wiki/Help:HTML_in_wikitext#Lists

[ol]...[[color=#FFFFFF]disregardthis[/color]/ol]

 represents an ordered list

something similar to that we have in Gmail.

When you say you have to close the window, do you mean cuz the wife or boss walked in? If so, why not just switch tabs instead (and start whistling and looking at the ceiling, of course)?

I was notified after submitting a post that I need to login again from my iPhone

You mean you lost the post? Why did it ask you to log in again? Perhaps the session lifetime expired. I think it used to be 15 minutes, I asked them to increase it now to 30 min. (They claim they don't want to increase it more for security reasons). But does this happen often?

Maybe it's because the post wasn't really so thought out and well written.

Cordnoy knows how to do that, and has also had results with a blank page

by the way guard, it seems you had an overdose of alcohol since your daily allowances from last week were postponed till yesterday

there is a solution and until we learn it the holy temple will continue to smolder

it's called

sharing
