

Testin' the New Editor

Posted by cordnoy - 07 Feb 2016 18:21

We thank Guard and his team for updatin' the site and the editor.

There are many new features to make it easier.

There are, however, still kinks as well.

In this post, there will be a list of questions, suggestions and error reportin'.

As a thread goes on, the post gets lost.

Accordin'ly, I will be doin' as follows.

If you have an issue, question, answer, comment, or whatever, email it to me:

thenewme613@hotmail.com.

I will then add it to this post.

All other posts on this thread (other than Guard's) will be deleted, for it will not be orderly, and then it will not get fixed.

Thank you

1. the "quote" feature needs to be fixed.
2. the "source" button needs to be explained.
3. the "quote" button on mobile version needs an overhaul.
4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code

Warning: Spoiler!

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: <http://tiptipa.org.il/template/img/benefits-2.png>) and sometimes it doesn't (like this IMAGE: <http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1>)

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

9. Tried to attach file - didn't work

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code. For example:
`color=#FF0000?? ??? ????? ????? ?" ???? 2 ?????? ??? (120 ?????) ?????[/color]`

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

This post will be constantly updated.

Thank you

[Gevura Shebyesod wrote on 03 Aug 2016 20:52:](#)

Chat issues:

Recent chats are not being saved in the chat history.

Our devs claim this was fixed. Please confirm.

I can open the chat in the browser on my phone, it only freezes occasionally. The public chat works OK, in the private chat I can see what people write to me but whatever I write never gets sent.

Also I notice that the usernames in the public chat thread are no longer clickable.

Our devs claim they can't reproduce these two issues. They wrote: We have tested points 2 and 3 on iPhone 5s and Samsung GT-I9300 and could not reproduce it. Could you provide us with device information, IOS version and browser on which those issues appeared?

Chat issues:

As of Today Thursday 6am on iPhone5

PUBLIC CHAT: Recent chats are not being saved in the chat history.

PRIVATE CHAT: After writing and closing out of the private chat page, the entire chat page is frozen and gives a blank web page and totally inaccessible. Including the public chat.

I'm going to try upload a screenshot here from my phone, but that's a different issue that hasn't been resolved, that often pictures don't upload from iPhone a posts, so if you don't see the picture in this post, it's fine, the chat rooms now give a blank web page

Guys, Until this issue is resolved, if you have a mobile device, don't write on the private chat, as you will be totally locked out of the public chat too

I'm even trying to access via other url's
eg guardyoureyes.com/cometchat/extensions/mobilewebapp/#lobby
or guardyoureyes.com/cometchat/extensions/mobilewebapp

Nothing works...

[Markz wrote on 07 Jul 2016 14:39:](#)

1) When the device is turned sideways (from portrait to landscape) the chat jumps to the 20th last message, and doesn't remain on the last message

2) A mobile user who is online on gye cannot see the chat, and should not show on the chat page that he is on the chat, unless he's actually on the specific Chat page

Our devs wrote that they fixed these issues. Here is what they wrote: Can someone test and let me know if it's fixed?

1) I've written code in javascript, which detect event, when orientation of device is changed. And this code changes position of the page(shows bottom part)

2) I've researched, how does this feature work, and written a condition, if user uses mobile, but he is not on chat pages, requests to server shouldn't be sent

I know this was fixed, and that definitely caused the bug we are currently facing, that the chat is messed up as Gevura and myself mentioned (earlier today) on this and the previous page

How about ask them to undo that fix until we get the chat up and running

If I edit my signature too many times it will be broken. So I gotta test changes elsewhere -

Seems to me that the gye coding has changed and doesn't allow the type of signature I had, but will have to be changed slightly, so please give me a half hour as I try update my signature

Try putting a space between the links.

it worked for me in the past.

[doingtshuva wrote on 07 Aug 2016 13:23:](#)

I have experienced that in the past.

Whats about having drafts?

Sometimes we are holding in middle of writing a long post and woops we have to close the window and we loose everything.

something similar to that we have in Gmail.

When you say you have to close the window, do you mean cuz the wife or boss walked in? If so, why not just switch tabs instead (and start whistling and looking at the ceiling, of course)?

At home we share a computer, so sometimes when my wife needs the computer urgently I can't just change a tab if I'm letting her use the computer.

At work, I'm very careful with GYE as my employer can see my internet usage. Knowing that my employer monitors my internet activity also helps not to fall at work, cause we don't have filters.

I had experienced today for the second time this week, after writing a long post and pressing submit my post got lost. It happend when I tried to reply to guardyoureyes.com/forum/4-On-the-Way-to-90-Days/294339-Re-Current-Streak-or---PASSED-90-DAYS
