

Testin' the New Editor

We thank Guard and his team for updatin' the site and the editor.

There are many new features to make it easier.

There are, however, still kinks as well.

In this post, there will be a list of questions, suggestions and error reportin'.

As a thread goes on, the post gets lost.

Accordin'ly, I will be doin' as follows.

If you have an issue, question, answer, comment, or whatever, email it to me:

[thenewme613@hotmail.com](mailto:thenewme613@hotmail.com).

I will then add it to this post.

All other posts on this thread (other than Guard's) will be deleted, for it will not be orderly, and then it will not get fixed.

Thank you

1. the "quote" feature needs to be fixed.
2. the "source" button needs to be explained.
3. the "quote" button on mobile version needs an overhaul.
4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code

**Warning: Spoiler!**

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: <http://tiptipa.org.il/template/img/benefits-2.png>) and sometimes it doesn't (like this IMAGE: <http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1>)

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

9. Tried to attach file - didn't work

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code. For example:  
`color=#FF0000?? ??? ????? ????? ?" ???? 2 ?????? ??? (120 ?????) ?????[/color]`

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

This post will be constantly updated.

Thank you

1) On PC: Posting regular reply: When completing the post I may go back and forth from source to regular, often on the 3rd or 4th time that i go back to regular, or to source - all the content **disappears**

2) On PC: Regular 'Reply' takes a few moments to load, longer than was previously

3) On PC: When I hit "Quote" on this old post [HERE](#), all the content **disappears**

and howbout the other 27 thin's?

In my humble opinion, there have been a lot of nerw additions, but the one thin' that is drivin' me crazy and perhaps others as well is the new quote thin'y. It is extremely difficult to find it and click on it and type under it. it has a mind of its own.....sorta like.....

I just press quote and then source from wherever I do it because I have no idea what I'm doing and that's worked for me.

But.... I think I'm the least technically proficient guy here- no signature, no graphics, no pictures, no links, so for me it's pretty simple.

But let me know what you find out.

If your asking me I would be against it, the Forum is not a place like or dislike others!

We are here to encourage, motivate and give chizuk to others.

Some times I see new members and then they get disappeared, is it cause sometimes we sound to offensive in our posts? I'm talking to myself.
