

Testin' the New Editor

Posted by cordnoy - 07 Feb 2016 18:21

We thank Guard and his team for updatin' the site and the editor.

There are many new features to make it easier.

There are, however, still kinks as well.

In this post, there will be a list of questions, suggestions and error reportin'.

As a thread goes on, the post gets lost.

Accordin'ly, I will be doin' as follows.

If you have an issue, question, answer, comment, or whatever, email it to me:

thenewme613@hotmail.com.

I will then add it to this post.

All other posts on this thread (other than Guard's) will be deleted, for it will not be orderly, and then it will not get fixed.

Thank you

1. the "quote" feature needs to be fixed.
2. the "source" button needs to be explained.
3. the "quote" button on mobile version needs an overhaul.
4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code

Warning: Spoiler!

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: <http://tiptipa.org.il/template/img/benefits-2.png>) and sometimes it doesn't (like this IMAGE: <http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1>)

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

9. Tried to attach file - didn't work

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code. For example:
`color=#FF0000?? ??? ????? ????? ?" ???? 2 ?????? ??? (120 ?????) ?????[/color]`

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

This post will be constantly updated.

Thank you

[cordnoy wrote on 13 Mar 2016 02:35:](#)

The "quote" function is terrible.

Sorry, but it worked so much better before.

I'm so busy doing the ODAAT, I totally forgot how things used to be

It seems the forum is not DST aware. You need to edit your profile and change your time zone.

Time for a **G** - gratitude

Not all issues have been dealt with, but things are better than they were, so **Thank you Guard**

and all the Kings devs

[markz wrote on 09 Feb 2016 06:00:](#)

When I hit submit, I got an error on top of the page

message: This field is required

Sir - Which field?????

I knew there were editing problems and BH I copied all before hitting submit, otherwise all that i drafted wouldve gone with the wind

When doing "Topic reply" , the submit button turns blue but does nothing,

when doing plain "reply", it submits but returns the above message

[not with all posts just one specific one]

Can you share which post you're taking about - I may have an idea

I'm not sure but I think I remember that happening when you create a post and insert a picture but nothing else. It thinks the body of the message is blank. If you just type something (even a space) it fixes it.

I can't share it 'cuz i couldn't post!

i'll pm you, but without the formatting.

"EDITING POST"

As mentioned previously on this thread, When submitting the post I may go back and forth from source to regular, often on the 3rd or 4th time that I re-**Submit**, go back to regular, or to source - all the editing content **disappears, and** when I hit "Quote" all the content **disappears**

Yes that prior 'broken' post i mentioned [here](#) is now editable, and my signature that broke as mentioned [here](#), is editable now too, but that was after a few week / months hiatus

Now the 1st post on the "Free Towing" thread is locked for me...

Edit or **Quote** isn't working

I cannot afford to break some precious posts, and therefore with all my apologies, I will have to edit those posts on this thread before completing and finally uploading to the proper place. There after I can delete the edit posts here

So, moderator if you see me write on this thread

"EDITING POST" you know now what I mean

Thanks

If you're talkin' to me, I haven't the slightest.

All I know is that the editor should work for us amateurs, and it doesn't.

I'm not complainin'.....it's a great service, but like filters, we haven't taken it to the level it could be.

Pictures, quotes, Spoilers, spell checkin', back spacin', mobile, etc.
