Testin' the New Editor
Posted by cordnoy - 07 Feb 2016 18:21

_____

We thank Guard and his team for updatin' the site and the editor.

There are many new features to make it easier.

There are, however, still kinks as well.

In this post, there will be a list of questions, suggestions and error reportin'.

As a thread goes on, the post gets lost.

Accordin'ly, I will be doin' as follows.

If you have an issue, question, answer, comment, or whatever, email it to me: thenewme613@hotmail.com.

I will then add it to this post.

All other posts on this thread (other than Guard's) will be deleted, for it will not be orderly, and then it will not get fixed.

Thank you

1. the "quote" feature needs to be fixed.

2. the "source" button needs to be explained.

3. the "quote" button on mobile version needs an overhaul.

4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code
Warning: Spoiler!

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: http://tiptipa.org.il/template/img/benefits-2.png) and sometimes it doesn't (like this IMAGE:http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1)

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

9. Tried to attach file - didn't work

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code. For example:
color=#FF0000**?? ??? ???? ???? ?"? ??? 2 ????? ??? (120 ?????) ????**[/color]

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

This post will be constantly updated.

Thank you

Welcome Aboard: I'd like the first few pages of this thread to be publicly shared / traded. My intent is to include universal trucking tips many guys can benefit from - that aren't found (yet) in 30 tool section.

Please Comment: I'm open to any input. If there's something in the first pages that you'd like to add or comment on, please do so right here

Keep on Trucking!!!

if you are wondering why there is a pointless post here, blame the new editor.

my intelligent contribution is available in the next post.

dearest admin,

enough already. the experiment failed. please roll back to the previous editor.

love always,

PA

Do not startup with GYE

All I know is that the editor should work for us amateurs, and it doesn't.

I'm not complainin'.....it's a great service, but like filters, we haven't taken it to the level it could be.

Pictures, quotes, Spoilers, spell checkin', back spacin', mobile, etc.

Hi Cordnoy and everyone else,

Are you folks still having issues with the forum? Because I spent 2 hours today testing all the issues that were posted here over the last few months and almost all of them seem to have been fixed. I also tested it on Android and iPhone. So if anyone still have issues with the new editor, please let me know.

EDITING A POST TOO MANY TIMES STILL BREAKS THE POST AS I TESTED ON THE PREVIOUS POST AND EXPLAINED [HERE](#)

The previous post is case in point

Try to quote it - it is blank

_____

I am aware of the quoting issue, but I can't reproduce the bug with switching from source back to regular causing the content to disappear.

Also, Cordnoy, we made quoting easier. One no longer needs to click the red arrow, they can just start typing below the quote. Don't you find it easier now?

_____

Thanks for trying that...

_____

Hey have you seen my avatar message recently?

Can we have the spoiler button changed from a box to :spoiler: emoji button, so we know where it is

Tables are automated to have borders, even when border size is set to 0

Can that be changed

Mucho Gra?ias
