_____

Ok guys this is a serious thread

I have a close rapport (*shuychus* in yiddish) with **the.guard** and the tech support team, and he requested that if anyone has any issues, they should please post it on this thread, and I will try pass it on promptly

1. **Important**: Please specify the 'bug' with as much detail as possible.   e.g. what device you are using, where you see the issue ~~what mood you were in, which bug spray did you try~~, and so on. E.g. "Chat on my Mobile Device (Specify what model) there's this blue chat circle...
Warning: Spoiler!

   "
2. **Update**: Reply here after you see the issue is resolved on your end.   So I can report that the bug is successfully [vanquished](#)

In order for me to ask the IT guy to look into it, I need you to write a post which messes up so that he can see a demo

If you can't write a broken post, that's even better

II type and nothing happens.

This time, it stutters, like many times.

I noticed you were hassled on recent posts

The only way it can be looked into is if you could note here the Device type and version you are using

Is this happening to you on any other websites other than gye?

On mobile app. (Android) there is no back button. Tapping the device's back button takes you to
the homepage instead of the previous page on the forums. I'm trying to get go back in time and I
keep pressing the wrong buttons!
