Ok guys this is a serious thread

I have a close rapport (*shuychus* in yiddish) with **the.guard** and the tech support team, and he requested that if anyone has any issues, they should please post it on this thread, and I will try pass it on promptly

1. **Important**: Please specify the 'bug' with as much detail as possible.   e.g. what device you are using, where you see the issue ~~what mood you were in, which bug spray did you try~~, and so on. E.g. "Chat on my Mobile Device (Specify what model) there's this blue chat circle...
   Warning: Spoiler!

   "
2. **Update**: Reply here after you see the issue is resolved on your end.   So I can report that the bug is successfully [vanquished](#)

Using the android app. Lots of issues.

1. When I reply I usually get a extra letter at the beginning of the post.
2. Tons of spelling mistakes. The editor skips letters that I typed. I have to go back to correct it.
3. Posts don't go through when I press submit, I usually need to press it twice. This caused one of my posts to submit 3 times.
4. Get rid of the big blue chat with us button.

Some of these issues have been mentioned here before.

Thanks!

IIf they don't listen to a Moderator, what makes you think they will listen to a junior poster?!

Also I have a security issue with the site. Don't want to publicly post it. Anyway to contact the devs directly? Should I use that blue chat button?
