

Bugs & Issues - Please report here

Posted by Markz - 28 Sep 2016 02:57

Ok guys this is a serious thread

I have a close rapport (*shuychus* in yiddish) with **the.guard** and the tech support team, and he requested that if anyone has any issues, they should please post it on this thread, and I will try pass it on promptly

1. **Important:** Please specify the 'bug' with as much detail as possible. e.g. what device you are using, where you see the issue ~~what mood you were in, which bug spray did you try,~~ and so on. E.g. "Chat on my Mobile Device (Specify what model) there's this blue chat circle..."

Warning: Spoiler!

"

2. **Update:** Reply here after you see the issue is resolved on your end. So I can report that the bug is successfully [vanquished](#)

I use a netbook, not a mobile device. But the side panel in the new site layout takes up a lot of horizontal "real estate", making it harder to view the forum posts.

Maskim to all of the above. Also on the mobile page there is no notification of new PMs anymore.

Mobile app on Android is completely useless with the new campaign going on. The banner takes up the whole page and when I click to dismiss, it opens the page to donate, with no option to go back.

Can you make the "X" function as intended to shut the banner without launching the campaign page?

Thanks!

on. (I left the mistakes in so you can see them. TThey all were causecaused by the app.)

I'll just email them...in case they don't see this.

Maybe I'll send them a screenshot of the last few posts here...

Guys - please post here what time of day you experience the crash, because it could help the dev to figure out what why when
