Ok guys this is a serious thread

I have a close rapport (*shuychus* in yiddish) with **the.guard** and the tech support team, and he requested that if anyone has any issues, they should please post it on this thread, and I will try pass it on promptly

1. **Important:** Please specify the 'bug' with as much detail as possible. e.g. what device you are using, where you see the issue ~~what mood you were in, which bug spray did you try,~~ and so on. E.g. "Chat on my Mobile Device (Specify what model) there's this blue chat circle..."

**Warning: Spoiler!**

"

2. **Update:** Reply here after you see the issue is resolved on your end. So I can report that the bug is successfully [vanquished](#)

While we're complaining about the homepage, there's no link on the main GYE homepage to click into the forum homepage. I think there used to be one but it disappeared a while back.

It seems that the forum is actually shown lower down on the homepage. I am wondering why the

flight to freedom program is featured on top, although it may sound like a nice plan with all the research, however I'm not sure how much research was based on our frum crowd.

As reality goes, I believe the forum has delivered much more substantial success than anything else so I would think that should be put at the top of the homepage for new users who login and for guys like our friend monster trucker

I think we should all be given access to the web files and the hosting account, this way we can just change things the way we see fit, without having to post here all the time.
